

Improve Clinical Outcomes and Family Experiences

Join VON's Critical Transitions internet-based collaborative (iNICQ)

Benefits of Participation

Participation in VON's critical transitions internet-based quality improvement collaborative includes:

- Toolkits outlining key evidence, potentially better practices, and change ideas for transitions in and out of the NICU, including admission, discharge and handoffs
- Dedicated listserv to communicate with expert faculty and your peers
- Online classroom, including recorded webinars accessible any time for CE credit
- Six webinars focused on select key drivers and their application to clinical scenarios, along with QI foundations
- Additional smaller group webinars on transition-specific topics. *Attend any or all.*
- QI Foundations course to advance QI knowledge for entire interdisciplinary team
- Curriculum and six webinars on implementing Experience-Based Co-Design (EBCD) with families and clinicians
- Improvement stories from teams applying QI and EBCD methodologies to critical transitions
- Live full-day event at VON's Annual Quality Congress with peer-to-peer learning
- Complimentary Annual Quality Congress registration for 4 clinical team members, 2 senior leaders, and all parent partners
- VON Days Audits to provide baseline gap analysis and to track progress over time
- Additional measurement for key drivers: teamwork and families as partners
- Maintenance of Certification (MOC) Part 4 credits for entire physician team
- CME, CNE, CPE for an unlimited number of team members

2020 Schedule and Topics

January 8

Kick-off and Orientation

Faculty-facilitated communities of learning focused on transition-specific topics and EBCD noted in **GREEN**. *Attend any or all.*

February 3-14

VON Day Audit period

February 12

Quality Improvement | Role of standardization on your improvement journey
Clinical Application: Decreasing NICU admissions due to hypothermia

February (TBA)

Experience-Based Co-Design Community | Introduction to EBCD process

March 11

Families as Partners | Creating a culture to engage families as partners
Clinical Application: Families engaged in or leading rounds

April (TBA)

Experience-Based Co-Design | Practicalities for getting started

April (TBA)

Critical Transitions | Topic-focused small group learning, sharing, and coaching
Clinical Application: Clinical transitions in, out, and handoffs

May (TBA)

Experience-Based Co-Design Community | Deeper dive into “discovery” phase

May 20

Teamwork | Developing shared mental models
Clinical Application: Delivery room resuscitation and transport into NICU

June 17

Quality Improvement | Optimizing quality improvement reporting
Clinical Application: Unplanned extubation

July 8

Families as Partners | Developmental touch points supporting follow up/follow through
Clinical Application: Developmental assessment as transition from the NICU is planned

July (TBA)

Experience-Based Co-Design Community | Moving into analysis phase

September 2

Teamwork | Advanced shared mental models
Clinical Application: Clinical situational awareness of NICU

September (TBA)

Experience-Based Co-Design Community | Digging into the co-design phase

October 12-23

VON Day Audit period

October (TBA)

Experience-Based Co-Design | Lessons from early adopters

October (TBA)

Critical Transitions | Topic-focused small group learning, sharing, and coaching
Clinical Application: Clinical transitions in, out, and handoffs

November 6

Annual Quality Congress | Face-to-face collaborative meeting
